

Legal Framework for Surrogacy in Kyrgyzstan

Закон КР от 12 января 2024 года № 14 "Об охране здоровья граждан в Кыргызской Республике"

Kyrgyzstan permits gestational surrogacy under its civil and family law framework, subject to defined contractual and medical conditions.

The legal structure generally allows:

Contract-based gestational surrogacy arrangements

Recognition of intended parent agreements

Medical execution within licensed healthcare institutions

Legal documentation procedures in accordance with civil registration standards

Surrogacy arrangements are conducted within the scope of applicable domestic legislation and formal contractual documentation.

All legal processes are handled in accordance with locally recognized regulatory requirements.

In Kyrgyzstan, surrogacy is officially regulated by Article 57 of the Law "On the Protection of Citizens' Health in the Kyrgyz Republic" dated January 12, 2024, No. 14. This law establishes the primary conditions for legally conducted surrogacy. According to it, regardless of medical indications or marital status, every individual has the right to become a parent using the surrogacy method. There are no strict restrictions for prospective parents, making participation in the program maximally accessible for all aspiring to parenthood.
